

BRITTON SMITH

Windows Systems Administrator | Cyber Security Specialist | Python Developer

britton.j.smith@proton.me

Professional Summary

Military veteran and Cyber Security Specialist with hands-on experience in Windows administration, vulnerability assessment, Python software development, and enterprise technical documentation through the CyberProAI Internship. Experienced troubleshooting Windows and Linux environments, developing modular software applications, and producing professional cybersecurity assessment reports. Seeking a Windows Systems Administrator position supporting enterprise infrastructure, vulnerability management, and security operations.

Military Service

Army National Guard (2006–2014); Operation Iraqi Freedom (2008–2009)

Commandant's List Recipient

Maintained a class rating of 95% or higher across academic performance, physical training evaluations, and company duty performance.

EDUCATION & CREDENTIALS

Certificate in Business Information Technology

Ivy Tech Community College

Awarded May 2026

CCNA: Introduction to Networks

Cisco Networking Academy / Ivy Tech Community College

Issued August 14, 2025

70 Hours of Instruction

Ivy Tech Community College

Cyber Security Specialist

January 2023 – Present

TECHNICAL SKILLS

Operating Systems

Windows Systems • Linux Administration

Enterprise Technologies

Active Directory Fundamentals • Group Policy Fundamentals • PowerShell Fundamentals

Security & Administration

Security Fundamentals • Network Security Concepts • Vulnerability Analysis • Security Documentation

Networking

TCP/IP Fundamentals • Cisco Networking Technologies • Network Infrastructure • Network Troubleshooting

Programming & Development

Python • JSON • Data Modeling • Software Architecture

NOVA APPLICATION PLATFORM

Designed and developed a modular Python application platform demonstrating enterprise software architecture, centralized data management, cybersecurity tooling, automation, and technical documentation.

Johnny Phive Data Core — Relational database engine supporting persistent data storage and application integration.

NOVA Sentinel — Cybersecurity vulnerability research tool for CVE tracking, NVD data collection, and security analysis.

NOVA Investment Analysis — Investment portfolio management application supporting transaction tracking and financial analysis.

NOVA Parrot — Structured document management system for technical writing and knowledge organization.

CORE COMPETENCIES

Regulatory Compliance • Technical Documentation • Risk Assessment • Operational Planning • Time Management

Customer Service • Stakeholder Communication • Problem Solving • Independent Decision-Making • Process Adherence

PROFESSIONAL EXPERIENCE

CyberProAI Intern

Ivy Tech Community College

Summer 2026

- Performed hands-on cybersecurity exercises in Windows and Kali Linux environments using the Cympire Cyber Range.
- Conducted vulnerability assessments, authentication troubleshooting, reconnaissance, and security policy analysis.
- Produced professional technical reports documenting cybersecurity methodologies, findings, and recommendations.
- Utilized Python and AI-assisted tools to support cybersecurity research, technical documentation, and workflow automation.

Commercial Transportation & Logistics Professional

2019 – Present

Employers: J.B. Hunt Transport Services • R+L Carriers • Marten Transport • Schneider National

Highlights:

- Maintained compliance with federal transportation regulations, safety standards, and hazardous materials requirements.
- Managed operational documentation, regulatory records, logs, and reporting with a high degree of accuracy.
- Coordinated time-sensitive logistics while consistently meeting critical operational deadlines.
- Exercised independent judgment and problem-solving in dynamic, unsupervised environments.
- Delivered professional customer service while communicating effectively with customers, dispatchers, and operational personnel.
