

CYBERPRO AI INTERNSHIP

Week 03 Work Report

CPAI-2026-003

Prepared By: Britton Smith

Reporting Period: Week 03

Course: CPIN-280 Cyber Security Internship

Bottom Line Up Front (BLUF)

Week 3 marked the transition from foundational cybersecurity concepts into practical penetration testing methodology. During the weekly CyberProAI Zoom meeting, Ken Smith emphasized approaching security assessments as professional consulting engagements through structured methodology, continuous documentation, and business-focused reporting. Practical work included beginning the **Breaking Barriers** assessment, completing reconnaissance, service enumeration, and vulnerability research, and successfully completing the **General Security Policy Assessment** with a score of **100%**. Individual activities completed during the reporting period are being documented separately as CyberPro AI Assessment Reports for inclusion in the internship GitHub portfolio. Additional internship milestones, including GitHub development, assessment reports, and assignment submissions, will be incorporated into this report as they are completed before submission.

Additional Information

- Guest Instructor: Ken Smith
 - Primary Training Platform: Cympire Cyber Range
 - Key Guidance: Continuous documentation, professional reporting, and business-oriented communication.
 - Carry-Forward Activity: Complete the Breaking Barriers exploitation phase once the Metasploit environment issue is resolved.
-

Progress Snapshot

Internship Progress	[██████████]	Week 3 of 7
Security Policy	[██████████]	Complete
Week 03 Meeting	[██████████]	Complete
Breaking Barriers Part 1	[██████████]	Complete
Week 03 Work Report	[██████████]	Draft Complete
Assessment Reports	[██████████]	2 of 4 Planned
Cympire Training	[██████████]	In Progress
GitHub Repository	[██████████]	Planned
GitHub Portfolio	[██████████]	Not Started
Cyber Security Resume	[██████████]	Not Started
