

CYBERPRO AI INTERNSHIP

Week 04 Work Report

CPAI-2026-004

Prepared By: Britton Smith

Reporting Period: Week 04

Course: CPIN-280 Cyber Security Internship

Bottom Line Up Front (BLUF)

Week 4 focused on professional portfolio development and career preparation activities supporting the CyberProAI internship. Required deliverables included updating the internship GitHub portfolio and revising the cybersecurity resume to better document technical experience, internship accomplishments, and professional growth. The GitHub repository was expanded with organized technical reports, research assignments, weekly documentation, and supporting project materials, while the resume was refined to more accurately reflect cybersecurity education, technical skills, and internship experience.

During the weekly CyberProAI meeting, instruction emphasized maintaining professional documentation, recording both successful outcomes and troubleshooting activities, and presenting work through a well-organized GitHub portfolio. Additional guidance covered cybersecurity resume development, career readiness, industry certifications, professional networking, and preparation for the upcoming Cybersecurity Professional Interview Assignment.

Additional Information

- **Primary Focus:** Professional Portfolio Development and Career Preparation
 - **Key Guidance:** Professional GitHub documentation, cybersecurity resume development, technical troubleshooting documentation, and career readiness.
 - **Carry-Forward Activity:** Complete the Cybersecurity Professional Interview Assignment and continue expanding the internship GitHub portfolio with completed coursework and technical documentation.
